How to Design a County Seal

There is a need to replace the state or county seal that is currently in use by the existing corporate county government due to copy right issues. When creating a new seal for your county, you want it to reflect the values of your community, but must be void of all occult, illuminati or corporate symbolism. Also, none of the writing or names utilized on the new official seal should be written in all CAPS!!!

Once your assembly has designed the artwork, you may order a 2" Embosser & gold seals by using the link and instructions below:

To design a new county seal, you may review the current seal for any corporation symbolization and redesign it or come up with a brand new concept. It is suggested to use:

https://www.simplystamps.com/logo-embosser-seal-with-text

to buy an embosser (they won't give you a hassle about the stamp looking like a corporate stamp and they will assist with any editing).

Use Upper and Lower case lettering (do not use ALL capitals) to put your County's name in the top text.

Use Upper and Lower case lettering to place "**Indiana"** in the lower text.

Upload your artwork to be displayed in the Center of the Embosser.

That's it, complete your order & it will be delivered in just a few days!

Collect donations to purchase the county seal embosser and gold stickers. Leftover donations can be used for ads or document filing fees. (Keep all receipts for possible reimbursement once the Republic is fully stood up).
